More than 12 years of experience as a developer. I worked for several companies with diverse projects, delivering quality and performant code. Always learning something new and eager to keep learning

PROFESSIONAL EXPERIENCE

EPAM   **Málaga,Spain**
Senior Software Engineer   *Jan 2022 – Current*

- Develop diverse apps for the clients, from a supermarket to a travel app.
- Develop libraries and process to accelerate the app delivery as well as being able to update parts of the app without the need of a new package or update
- Implement CI/CD practices to improve the process of QA and production delivery. Saving time and money for the client.
- Implement libraries and services to track app usage, enabling the analysis of user behavior and enhancement of the app experience
- Integration with LLM backend to provide app a comprehensive guide and ability to create custom itineraries

ENDAVA   **Buenos Aires, Argentina**
Senior Software Engineer   *Mar 2020–August 2021*

- Tech Lead in React projects, taking new responsibilities on research and improvements of the application, and supervising that the stories have all the needed requirements and acceptance criteria.
- Checked code quality and security in a code that will start to manage the company, to verify the viability and all the improvements needed
- Implementation of accessible code, complying with the WCAG rules for web and mobile applications.
- Principal developer and Tech Lead in a React Native application for mental health, applying WCAG rules, and a variety of new functionality in the app.

Ingenico e-Payments   **Buenos Aires, Argentina**
Senior web developer   *Nov 2017– Mar 2020*

- Develop several implementations for e-Payments through the services that the company provides
- Created a comprehensive guide to use the services and how to implement in their websites
